- All skin tones, including tanned skin
- Quick treatment
- Proven safety record

Alma
Lasers™

THE POWER OF THREE FOR HAIR-FREE SKIN

Soprano ICE Platinum targets unwanted hair at **three levels** to provide the most **complete** and **effective** hair removal solution available today- for all skin tones and hair types.

The continuous struggle to remove unwanted hair can be a lifelong battle. From traditional methods like waxing to advanced approaches like laser treatment, achieving permanent hair reduction remains a challenge, with long, painful treatments at worst and temporary results at best.

But now, thanks to breakthroughs in research and development at Alma Lasers, Soprano ICE Platinum offers a simple, one-stop solution for all-inclusive hair removal catering to **your specific needs**.

Whether you have light, dark or tanned skin, coarse or fine hair, Soprano ICE Platinum targets unwanted hair at **multiple levels** for optimal results, with effective hair removal that's **safe, quick** and best of all- virtually **painless**.

The Technology

>> Each hair follicle consists of three main anatomical structures and can grow from different depths within the skin. Soprano ICE Platinum's **Trio Clustered Diode Technology** combines the **3 most effective laser wavelengths** for hair removal, **simultaneously** targeting **all structures** within the hair follicle at **all depths**.

>> Different hair and skin types also respond best to different laser wavelengths. Soprano ICE Platinum incorporates the benefits of **multiple wavelengths** and **technologies**, providing a **customized treatment session** for every patient.

>> **SHR technology** gradually heats the skin to a temperature that effectively damages the hair follicles and prevents hair from growing back.

>> The sweeping **In-motion™ technique** keeps the laser in constant motion ensuring full coverage of the treatment area - improving results with shorter treatment times.

>> **ICE™ tech** cools the skin preventing burns and allowing for virtually pain-free, yet highly effective hair removal.

>> A variety of applicators allows your doctor to treat **any part of the body**, including the smallest and most sensitive areas.

QUICK & COMFORTABLE HAIR REMOVAL

Virtually Painless

Treatment is virtually painless.

Triple Targeting Treatment

Simultaneously targets the 3 main structures of the hair follicle at 3 different depths within the skin, for all-inclusive hair removal.

All Skin Tones and Hair Types

Effective results for light, dark or tanned skin as well as coarse or fine hair.

Quick and Safe

Treatment sessions are super-quick, even for large areas, and have a first-rate safety record.

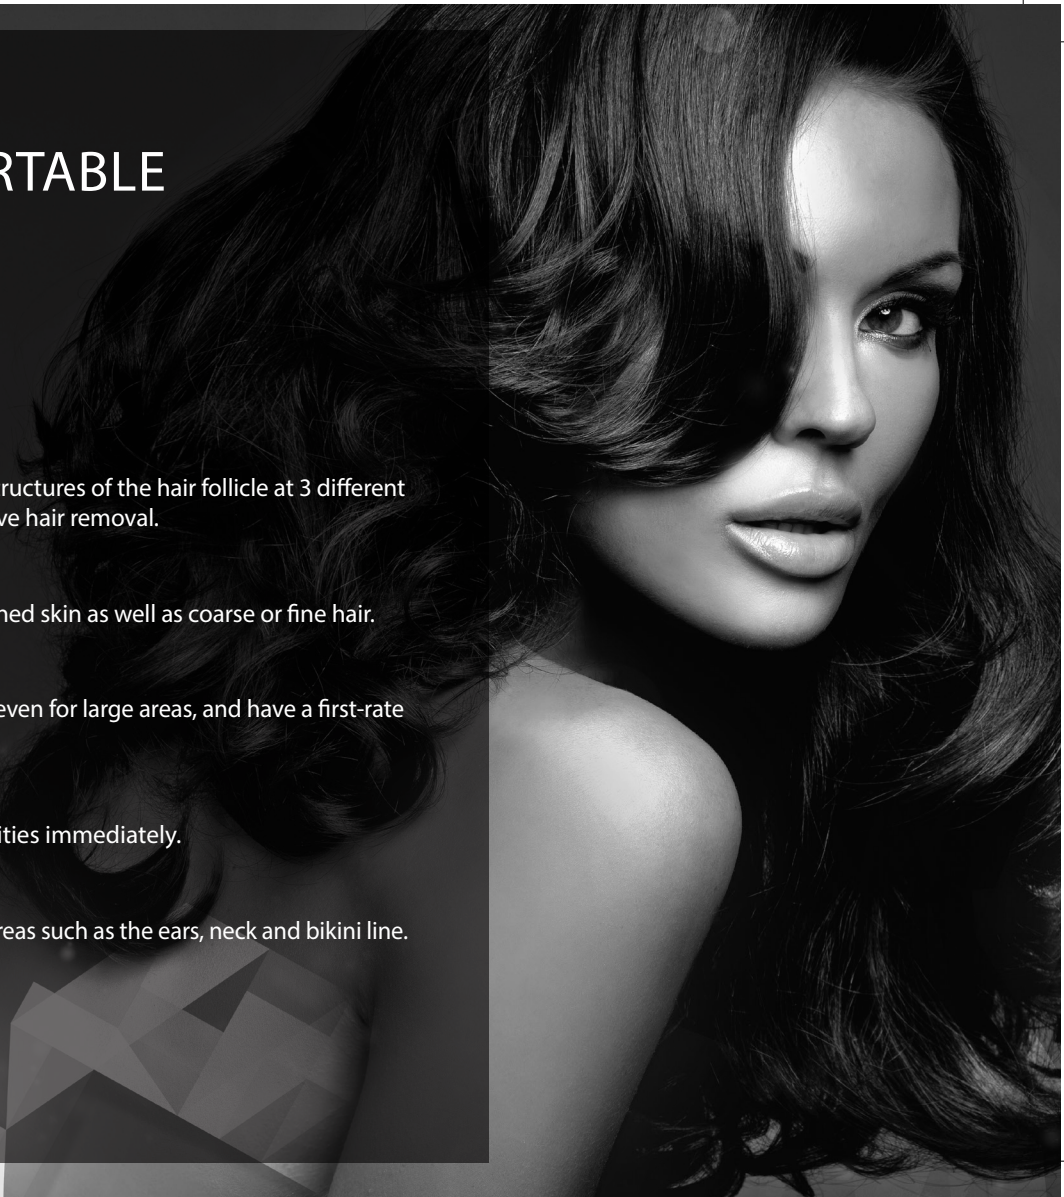

No Downtime

You can return to your normal activities immediately.

Perfect for any area of the body

Including sensitive or hard to reach areas such as the ears, neck and bikini line.

Alma Lasers is a global innovator of laser, light-based, radiofrequency and ultrasound technologies for the aesthetic and surgical markets. We enable practitioners to offer safe and effective procedures while allowing patients to benefit from state-of-the-art, clinically proven solutions and treatments.
